Hi Yvonne. It is our understanding that the OSE is the first regulatory agency to contact in the Water Trust Board application process. It appears we need to submit a Water Rights form.

Can you provide the form and guidance?

Thanks,

Jim Lesher  
East Culpepper Flats DWCA

Hi Maria,

I am contacting you as part of the WTB application process. Please advise as to your process/requirements for:

- Safe Drinking Water Act
- New Mexico Water Regulations
- Sanitary Project Act
- Certified Operator

We would like to get an early start to meet the February deadline.

Thanks in advance for your assistance.

Hi Jim,

The East Culpepper Flats DWCA does not appear in our database. Could it be under a different name? If it's not under a different name than you are not a Public Water System under our jurisdiction and the requirements below do not apply to your system. Let me know if you have any questions.

Thank you.

Maria J. Medina

Thanks for the quick response!

NMPRC provided us a Certificate of Incorporation. January 30, 2012. # 4573242

We are listed as an eligible special use/public water system (ICIP)

It would be good news and less work for both of us, if we do not need your certification and would be still eligible to continue the WTB application.

What do you think?

Thanks,

Jim

Do you fit the following definition of a Public Water System:

Public Water System-a system for the provision to the public of water for human consumption through pipes or, after August 5, 1998, other constructed conveyances, if such system has at least fifteen service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year.

If you fit the above definition than you are considered a Public Water System and one of our compliance officers will have to come out and conduct an Sanitary Survey (inspection) and until the Sanitary Survey is completed I will not be able to provide you with a letter certifying the requirements below.

Let me know if you fit the definition and we can go from there.

Thank you.

No, we do not fit the definition.

Our project , however, is for a regional pipeline connection with two larger systems in San Juan County that will also provide water to us.

Suggestions?

Thanks,

Jim

To: James Lesher <james.lesher@gmail.com>

Since you do not fit the definition of a Public Water System than you are not under our jurisdiction therefore the requirements for the WTB do not apply.

Please let me know if you have any more questions regarding this matter.

Thank you.
